Project Name	Streamlining IT Procurement: Automating Standard Laptop Orders with Flow Designer	Maximum Marks	4 Marks

IDEATION PHASE • EMPATHIZE & DISCOVER

Empathy Map Canvas: Standard Laptop Procurement & Fulfillment Process

In the current IT procurement process, standard laptop requests suffer from severe operational friction, manual triage bottlenecks, and delayed handoffs between request approval and device staging. Configuration tasks are routinely delayed or overlooked because coordinators must manually create catalog tasks and route them across teams. This Empathy Map examines the workplace realities and frustrations experienced by procurement and hardware personnel to guide our Flow Designer automation.
