

Date	30 September 2026	Team ID	SWTID-2026-2668
Project Name	Streamlining IT Procurement: Automating Standard Laptop Orders with Flow Designer	Maximum Marks	2 Marks

PROJECT DESIGN PHASE • PROBLEM - SOLUTION FIT CANVAS

Framework: Customer Context • Root Cause • Behavioral Channels • Flow Solution

1. CUSTOMER SEGMENT(S)

CS

Primary Customers:

- IT Procurement Specialists & Coordinators handling hardware ordering queues.
- Hardware Staging Technicians imaging standard laptops.

End Beneficiary:

- Enterprise employees & new hires receiving Lenovo ThinkPads.

2. JOBS-TO-BE-DONE / PROBLEMS

JtBD

Job-to-be-Done: Ensure standard laptops are staged and ready immediately upon arrival without manual coordination.

Core Problems:

- Manual task creation is prone to delay and oversight.
- Laptops sit idle in inventory while employees wait unproductively.

3. TRIGGERS & 4. EMOTIONS

TR & EM

Triggers (TR): Manager marks request as "Approved"; hiring surge creates triage bottleneck.

Emotions (EM):

- Before:* Frustrated, overwhelmed by manual triage, anxious about delayed hardware deliveries.
- After:* Confident, relieved, in control with 100% automated handoffs.

6. CUSTOMER CONSTRAINTS

CC

- Zero Additional Licensing:** Must run natively on existing ServiceNow ITSM entitlement.
- Zero Custom Script Debt:** Architecture must avoid custom JavaScript code to survive platform family upgrades.
- Strict Delivery SLA:** Task creation must occur in seconds to prevent staging downtime.

9. PROBLEM ROOT CAUSE

RC

Disconnection at Process Engine:

- The Service Catalog item lacked automated workflow routing.
- Approval events in sysapproval_approver had no automated listener to trigger task creation in sc_task.
- Fulfillment depended entirely on manual coordinator handoffs.

10. YOUR SOLUTION

SL

ServiceNow Flow Designer Automation:

- Build flow **"Standard laptop task"** running under System User in Global scope.
- Triggered by Service Catalog submission; auto-executes on Approval.
- Auto-creates sc_task assigned to "Hardware" with Short Description "Laptop need to Configured".
- Directly attached via Maintain Items > Process Engine.

5. AVAILABLE SOLUTIONS

AS

- Manual Triage:** Coordinators manually log tasks after reading approval emails (high error rate).
- Legacy Workflow Editor:** Graphical workflow on sc_req_item (deprecated pattern, hard to maintain).
- Business Rules:** Scripted after-insert rules (high maintenance, upgrade risk).

7. BEHAVIOUR

BE

Current Manual Workaround:

- Coordinators periodically check sc_request for approved orders.
- Manually open each RITM, create a new Catalog Task, type "Laptop need to Configured", and select Hardware group.
- Ping technicians via email/chat to confirm task receipt.

8. CHANNELS OF BEHAVIOUR

CH

8.1 Online Channels:

- ServiceNow Service Portal (Hardware Catalog).
- Service Operations Workspace / Fulfillment Queue.
- Email approval notifications & Teams/Slack triage.

8.2 Offline Channels:

- Hardware staging room, inventory stockroom, IT walk-up desk.
