Project Name	Streamlining IT Procurement: Automating Standard Laptop Orders with Flow Designer	Maximum Marks	2 Marks

PROJECT DESIGN PHASE • PROBLEM - SOLUTION FIT TEMPLATE

ServiceNow Flow Designer • IT Hardware Procurement Automation

PURPOSE OF PROBLEM - SOLUTION FIT:

- | | | | | |
|---|--|--|--|--|
| <ul style="list-style-type: none"> ✓ Solve complex fulfillment delays in a manner that fits the natural operational flow of procurement staff. | <ul style="list-style-type: none"> ✓ Increase solution adoption by tapping directly into native mediums (ServiceNow Service Catalog and Workspace). | <ul style="list-style-type: none"> ✓ Sharpen operational coordination with automated triggers (Manager Approval) and pre-filled instructions. | <ul style="list-style-type: none"> ✓ Eliminate frequent annoyances and handoff errors, establishing trust and reducing user wait times. | <ul style="list-style-type: none"> ✓ Understand existing manual handoff bottlenecks to ensure the automated workflow directly resolves root causes. |
|---|--|--|--|--|

1. CUSTOMER SEGMENT(S) CS Target Profiles: - Primary: IT Procurement Specialists & Coordinators managing hardware orders. - Fulfillers: Hardware Staging Technicians imaging laptops. - End Users: Enterprise employees awaiting standard laptop deliveries.	6. CUSTOMER CONSTRAINTS CC Operational Limits: - Zero Added Licensing: Must run natively on existing ServiceNow platform. - Zero Custom Script Debt: Avoid custom Business Rules to prevent upgrade breaks. - Strict Delivery SLA: Task creation must occur in seconds to prevent idle stock.	5. AVAILABLE SOLUTIONS AS Current Alternatives: - Manual Triage: Coordinators read approval emails and log tasks by hand (high error rate). - Legacy Workflow: Deprecated Workflow Editor on sc_req_item. - Custom Scripting: after-insert Business Rules (high maintenance).
2. JOBS-TO-BE-DONE / PROBLEMS J4BD Core Job-to-be-Done: Ensure standard laptops are staged and ready immediately upon request approval. Key Problems: - Manual task handoffs cause configuration delays and missed tickets. - Laptops sit idle in inventory while employees wait unproductively.	9. PROBLEM ROOT CAUSE RC Disconnect in Process Engine: - Catalog items lacked automated workflow bindings under Maintain Items. - Approval updates in sysapproval_approver had no automated listener to trigger task creation in sc_task. - Fulfillment relied entirely on manual coordinator triage.	7. BEHAVIOUR BE Current Workaround: - Coordinators periodically scan sc_request for approved orders. - Manually open RITM, click "New Task", type "Laptop need to Configured", and select Hardware group. - Coordinate manually via chat/email to verify technician receipt.
3. TRIGGERS TR Line manager marks request state as "Approved"; high-volume employee hiring waves.	10. YOUR SOLUTION SL Flow Designer Native Automation: - Create flow "Standard laptop task" running as System User in Global scope. - Trigger on Service Catalog; generate sc_task directly on approval. - Auto-assign to "Hardware" with description "Laptop need to Configured". - Bound directly via Maintain Items > Process Engine.	8. CHANNELS OF BEHAVIOUR CH 8.1 ONLINE: - ServiceNow Service Portal (Hardware Catalog). - Service Operations Workspace / Fulfillment Queue. - Approval email notifications and Teams/Slack triage. 8.2 OFFLINE: - Hardware imaging lab, inventory stockroom, walk-up desk.
4. EMOTIONS: BEFORE / AFTER EM - Before: Frustrated by manual data entry, anxious over missed SLAs and escalations. - After: Confident, relieved, in control with 100% automated handoffs.
