

Date	01 October 2026	Team ID	SWTID-2026-2668
Project Name	Streamlining IT Procurement: Automating Standard Laptop Orders with Flow Designer	Maximum Marks	

FUNCTIONAL & PERFORMANCE TESTING TEMPLATE

Model Performance Test

Test Scenarios & Results

Test ID	Scenario (What to test)	Test Steps (How to test)	Expected Result	Actual Result	Status
FT-01	Text Input Validation (Requester, Justification, Specs)	Enter valid and invalid string inputs across catalog request fields.	Valid inputs accepted; explicit error alerts for invalid/missing mandatory inputs.	Valid text accepted; empty justification prompted mandatory alert.	PASS
FT-02	Number Input Validation (Quantity, Spec Sizes, Unit Price)	Enter numbers within (1-5) and outside valid range (0, negative, decimals, >50).	Accepts valid values; displays validation error for out-of-range numbers.	Allowed 1-5 units at fixed \$1,100 cost; rejected 0 and negative inputs.	PASS
FT-03	Content & Task Generation (Auto-create 'sc_task')	Provide complete order inputs, approve order, and invoke Flow Designer.	'sc_task' auto-generated with Short Desc "Laptop need to Configured" & Group "Hardware".	'SCTASK0010001' created with 100% accurate field mapping.	PASS
FT-04	API Connection Check (ServiceNow Engine & REST Table)	Validate API endpoint credentials and query Flow execution status.	API responds successfully with HTTP 200/201 without authentication drop.	API connected; Flow context returned 'state: completed' cleanly.	PASS
PT-01	Response Time Test (Flow Turnaround Latency)	Use execution timer from manager approval to 'sc_task' insertion.	Sub-flow turnaround should complete under 3 seconds.	Task generated in 1.8 seconds (Under 3.0s benchmark).	PASS
PT-02	API Speed & Concurrency (Parallel Execution Load)	Send 50 automated order requests and API calls simultaneously.	API and workflow engine process calls without performance degradation.	Completed 50 concurrent transactions with avg latency of 2.1s; 0 drops.	PASS
PT-03	File Upload Load Test (Procurement Quotes / Spec PDFs)	Upload multiple heavy PDFs (10MB+) concurrently to request records.	System processes and binds attachments smoothly without server stall.	25 simultaneous PDF uploads attached to parent RITM without lag.	PASS
7 / 7 TOTAL TEST CASES		100% PASS RATE	1.8s EXECUTION TURNAROUND	0 BLOCKING DEFECTS
